Five Things NOT to do in an Essay

In a conclusion, don't just say that you have discussed what the question has asked you to discuss You must be specific and say what the key aspects were (and why) The trick is to say what you have argued in a concise way that does not just repeat what you have already said (don't repeat your examples) Like introductions, conclusions

Introduction to the R Language - Functions

stored as R objects just like anything else In particular, they are R objects of class "function" f <- function(<arguments>) {## Do something interesting} Functions in R are "R class objects", which means that they can be treated much like any other R object Importantly, Functions can be passed as arguments to other functions
